Internet has been very common in Taiwan. Many teenagers make Net pals through the chat room online. But now they have a new way—webcam!

The webcam is a kind of camera which can send images through the Internet to the person you talk to online. Before, you just could send some special signs to show your feelings—“ : -) ” means you are smiling ; “ :- (” means you are ***in a bad mood***. But now, you just need to turn on your webcam, the person you talk to can see what you are doing, know if you are happy. If you use a microphone, your Net pals even can hear your voice.

Thanks to the webcam, we change the way we make Net pals with. But be sure that you are ready before turning on the webcam, or you will send some embarrassing images that you won't send to anyone.
